

Actuarial Valuation As Of June 30, 2000 June 19, 2001

Board of Fire and Police Pension Commissioners City of Los Angeles Fire and Police Pension Plan 360 East Second Street, Suite 600 Los Angeles, California 90012

Members of the Board:

We are pleased to present our actuarial valuation report as of June 30, 2000 for the following plans:

- Fire and Police Pension Plans Tier 1
- Fire and Police Pension Plans Tier 2
- Fire and Police Pension Plans Tier 3
- Fire and Police Pension Plans Tier 4

This report is divided into three parts:

- I. Valuation Summary: This section contains an overview of significant valuation results.
- II. Valuation Detail: This section contains more detailed results of the valuation.
- III. Exhibits: This section contains information on plan demographics, plan provisions, and actuarial assumptions used in the valuation.

We appreciate the opportunity to serve the Board of Fire and Police Pension Commissioners as actuary for the Fire and Police Pension Plans.

Sincerely,

an B. S. for

Lawrence B. Di Fiore, FSA Consulting Actuary

Actuarial Valuation As Of June 30, 2000

Introduction

Members of the Los Angeles Fire and Police Departments and their beneficiaries are entitled to pension, disability, and survivor benefits under Articles XVII, XVIII, and XXXV of the Charter of the City of Los Angeles, and post-retirement health subsidy benefits under sections 189, 190.50 and 536 of the City Charter, and by related Ordinance.

Article XVII, the Fire and Police Pension System, covers employees hired before January 29, 1967, except those who elected to transfer to the New Pension System.

Article XVIII, the New Pension System, covers employees hired after January 28, 1967, and before December 8, 1980 (except those who were hired before January 28, 1967 and elected to transfer from the Fire and Police Pension System).

Article XXXV, the Safety Members Pension Plan, covers employees hired on or after December 8, 1980. The plan also covers those certified paramedics and civilian ambulance employees who transferred from the City Employees' Retirement Plan during the year ending June 30, 1983, or have since been hired.

Effective July 1, 1997, a new tier was established for Article XXXV. Active Members hired prior to July 1, 1997 could elect to join the new tier, which has eligibility for service retirement requirements similar to Article XVIII, as of July 1, 1997. Members hired after July 1, 1997 will automatically be covered under the new tier of Article XXXV, except Members hired between July 1, 1997 and December 31, 1997 who can elect to transfer to the old tier.

Changes to the Charter of the City of Los Angeles, effective July 1, 2000 renamed the above Articles as provided by Sections 1300, 1400, 1500 and 1600. The plan name changes are as follows:

Former Name

Name Effective July 1, 2000

| • Fire and Police Pension Syste | | | | |
|---------------------------------|----------------|--|--|--|
| | (Article XVII) | | | |

- New Pension System (Article XVIII)
- Safety Members Pension Plan (Article XXXV, Plan 1)
- Safety Members Pension Plan (Article XXXV, Plan 2)

Fire and Police Pension Plans – Tier 1 Fire and Police Pension Plans – Tier 2

Fire and Police Pension Plans – Tier 3

Fire and Police Pension Plans – Tier 4

In addition, the change to the City Charter requires separate contribution calculations for Tier 3 and Tier 4. Previously, the recommended contribution amounts for Article XXXV, Plan 1 and Article XXXV, Plan 2 had been combined.

In this report, we have used the new nomenclature and shown separate results for Tiers 3 and 4, as appropriate.

This report contains the results of the June 30, 2000 valuation of both the Pension and Health Subsidy benefits of the Plan. It contains the results of our calculations of the annual budget of the Plan, as provided in Sections 186.2(1), (2) and (3), 190.09(1), (2) and (3), and 528(1), (2) and (3) of the Charter. It also contains the funded status and disclosure information required under Government Accounting Standards Board (GASB) Statements Number 25, 26 and 27.

Actuarial Assumptions

The valuation results were based on the demographic and economic assumptions adopted as a result of the study of Plan experience made as of June 30, 1998.

The following economic assumptions were unchanged since the last valuation.

- 8.5% annual interest,
- 5.0% annual increases in total Plan payroll,
- 5.0% annual increases in the Consumer Price Index. Where the annual increase in benefits is capped at 3%, for Tiers 3 and 4 benefits, this cap was reflected in our calculations, and
- Individual salary increase assumption, which varies by age, ranging from 10% for Members under age 25, to 5.5% for Members age 50 and over, and averages 6.5% per year over a full 30-year career.

We also assume that future health subsidy benefits paid to retired Members will increase each year at certain rates. These health subsidy benefit increases were unchanged since the last valuation.

We believe these assumptions are appropriate for use in the evaluation of the liabilities of the Fire and Police Pension Plan at June 30, 2000. These assumptions are described in more detail in Exhibits III and IV.

Plan Provisions

This valuation incorporates two changes to the plan provision since the last valuation.

- Domestic partners are now eligible for surviving spouse benefits.
- Health Subsidy benefits now continue to eligible surviving spouses/domestic partners upon the death of the Member.

Discussion of Valuation Results

This section discusses the significant results presented in this report and observations on issues facing the Plans.

Funded Status

The actuarial funded ratio for all benefits, both pension and health subsidy combined, increased from 102.1% to 110.7%. This equates to an actuarial surplus of over one billion dollars. This increase in funded ratio is primarily due to continued returns on assets that are greater than the expected rate of 8.5%, as well as lower than expected cost-of-living increases.

On a market value basis the funded ratio would be 125% for Pension and Health Subsidy benefits combined. This is because the asset method used for the Plans phases in asset gains or losses over a period of five years. Since there have been significant asset gains in each of the last five years, a sizeable amount of assets has yet to be fully included in the actuarial value of assets.

Contributions

The total City contribution recommended for 2001-2002 is as expected much less than that recommended contribution for 2000-2001. This is due to the large increase in the surplus for Tier 2. For Tier 2, the amortization of the surplus is estimated to completely offset the City's normal cost contribution for 2001-2002, resulting in no Tier 2 contributions. Tier 2 Members are still required to make contributions as specified by the City Charter.

The City's contribution for all Tiers should continue to decrease over the next five as the past asset gains are phased in, unless there are actuarial losses, improvement to benefits, or decreases in the Members' contribution rate.

Changes to Plan Provisions

There were two changes to the Plan provisions since the last valuation;

- providing surviving spouse benefits to domestic partners, and
- providing health subsidy benefits to surviving spouses.

The benefits to domestic partners had minimal effect on the funded status or recommended contribution.

The health subsidy for surviving spouses' provisions had a notable effect on the Plans. This benefit improvement caused an increase in the UAAL of almost \$100 million, and increased the present value of future benefits by 13%. The benefit improvement caused the actuarial funded ratio for Health Subsidy Benefits to decrease from 74.8% to 65.6% as of June 30, 2000.

Tier 3 and Tier 4

The City Charter separates the two Plans of Article XXXV into Tiers 3 and 4 as of July 1, 2000.

For the purpose of determining the contributions for the 2001-2002 Plan year, it was necessary to determine the Unfunded Actuarial Accrued Liability for both Tier 3 and Tier 4 as separate Plans. This was done by first prorating the actuarial value of assets as of June 30, 2000 between the two Tiers on their respective actuarial accrued liability. The UAAL is the difference between each Tier's actuarial accrued liability and their prorated assets. This methodology results in each Tier having the same funded ratios.

Demographics

The most significant change in the Plan's demographics is a decrease of 1.7% in the active membership. This was caused by a 313 Member decrease in the number of Police Members. The number of Members receiving a pension increased by 242.

Budget Requirements

Generally an actuarial cost method assigns a particular level of cost to each year of a Member's service. Each year's cost is called the normal cost and represents the unit of cost allocated to that year. The Entry Age Normal Cost Method produces an annual cost that is level as a percentage of a Member's annual salary.

The concept of "actuarial accrued liability" is the amount of money that should have been accumulated for a Member who has been with the Plan a period of time. Stated another way, the actuarial accrued liability is the amount of funds that would now exist for that Member, if under the cost method being used, the Plan had always contributed the calculated normal cost each prior year.

When the value of the assets (as calculated using the Plans' Asset Valuation Method) is less than the actuarial accrued liability there exists an unfunded actuarial accrued liability (UAAL). If the assets exceed the actuarial accrued liability, a surplus exists.

The Charter of the City of Los Angeles requires that budget amounts for Tiers 1, 2, 3, and 4 be determined using the Entry Age Normal Cost Method. The required contribution is made up of two parts:

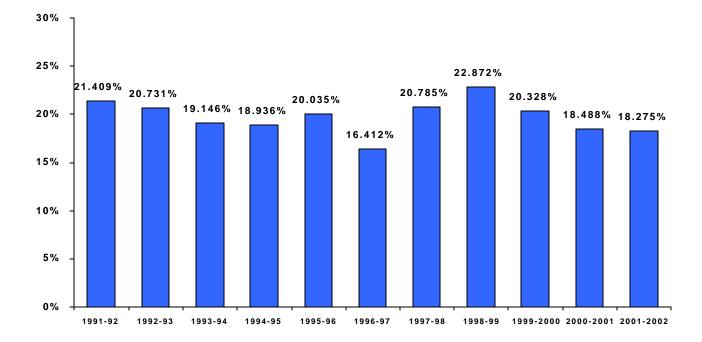

- The Normal Cost, or the level percentage of salary each year necessary to fund participants' plan benefits from date of employment to date of retirement.
- The payment to amortize the Unfunded Actuarial Accrued Liability. The method of amortization varies between Tiers.

On the following pages, we present a summary of 2001-2002 budget requirements for Tiers 1, 2, 3, and 4, along with comparisons to the budget figures for 2000-2001 (from our June 30, 1999 valuation).

An analysis of the change in contributions for each Article can be found in the gain and loss analysis later in this report.

Funded Status At June 30, 2000

In order to assess the funded status of the Plans, disclosure of a standardized measure of pension liability is required by the Government Accounting Standards Board (GASB). In late 1994, the GASB Board issued GASB Statement No. 25 - *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans* effective June 15, 1996, GASB Statement No. 26 - *Financial Reporting for Post Employment Healthcare Plans Administered by Defined Benefit Pension Plans* effective June 15, 1996 and GASB Statement No. 27 - *Account for Pensions by State and Local Government Employees*, effective June 15, 1998. The new statements supersede GASB Statement No. 5. The disclosures under the new statements are presented in this valuation report. Under the new statements, the measure of funded status compares the actuarial accrued liability under the plan's funding method as of June 30, 2000 to the value of remaining benefit payments is disclosed. For active members, the actuarial accrued liability as of June 30, 2000 is disclosed.

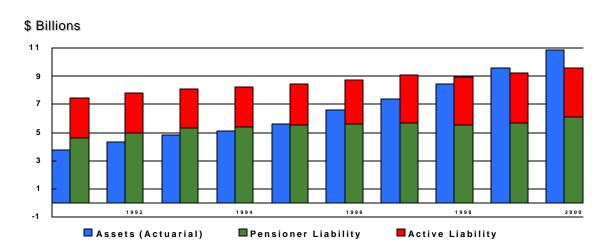

Under GASB Statement No. 12, *Disclosure of Information on Post Employment Benefits Other Than Pensions by State and Local Government Employers*, issued in November 1989, the expenditures and expenses for the period are the only financial information that needs to be disclosed for postretirement health subsidy benefits. However, the statement encourages more complete disclosures of information, if available. Therefore, we have included a GASB No. 25 figure for the health subsidy benefits of the Plan in this report, as if GASB No. 25 applied to health subsidy benefits.

On the next pages, we present the funded status of Tiers 1, 2, 3, and 4 combined under GASB No. 25, along with a comparison of the Plans' funded status in prior years.

The graph on the following page compares assets and liabilities under GASB No. 25 for pension benefits only for the years 1991 to 2000. All liabilities shown below have been calculated under GASB No. 25. The asset values shown on the following graph for 1996 and later have been calculated under GASB No. 25. Prior to 1996 the asset values shown are based upon the asset valuation method in effect for that year.

As of June 30, 2000, both the market value and actuarial value of assets exceeds the total actuarial accrued liability. For Tiers 2, 3 and 4 there is no unfunded actuarial accrued liability (UAAL) of pension benefits, the Plan is in a surplus position.

Summary Of Plan Funding

As of June 30, 2000, the Plan had assets at actuarial value equal to 114.4% of the actuarial accrued liability of pension benefits, as calculated under GASB No. 25. When compared to the present value of all future pension benefits expected to be paid by the Plan, as shown on the Actuarial Balance Sheet (page 40), assets equal 94.9% of liabilities. This remaining unfunded liability is to be funded by future City and Member contributions to the Plan.

Similarly, the Plan had assets at actuarial value equal to 65.6% of the actuarial accrued liability of health subsidy benefits under GASB No. 25. When compared to the present value of all future health subsidy benefits expected to be paid by the Plan, assets equal 52.2% of liabilities as of June 30, 2000.

The pattern of these future contributions is defined in sections 186.2, 190.09 and 528(1) of the Charter of the City of Los Angeles. These contributions are made up of two parts:

- Normal Cost Contributions: These contributions are determined as a level percent of covered payroll for each Article. If all assumptions are realized and there are no gains or losses, this percentage will remain level in the future. However, the contributions will increase as a dollar amount as total covered payroll increases.
- Funding of Unfunded Actuarial Accrued Liability (UAAL): The UAAL will be funded as a level dollar amount for Tier 1 and will remain level if there are no future gains or losses. For Tiers 2, 3 and 4, the UAAL will be funded as a level percent of payroll. If the Tier has a surplus instead of an UAAL the contribution will be negative, and offset the normal cost. Again, if all assumptions are realized and if there are no gains or losses, this percentage will not change. However, it will increase as a dollar amount as the total covered payroll increases.

The total contribution will be the sum of the Normal Cost and UAAL contributions.

If there are no future gains or losses, then under the current Charter provisions, the UAAL for Tiers 1 and 2 is expected to be fully funded in the fiscal year 2036-2037. After the UAAL is funded, contributions will consist of the Normal Cost only. As the Membership in Tiers 1, 2, and 3 diminishes, the Normal Cost for the total Plan will decrease towards the level of the Normal Costs of Tier 4 for pension benefits and increase towards the level of the Normal Cost of Tier 4, for health subsidy benefits.

Actuarial Valuation As Of June 30, 2000

Plan Membership

On the following schedules we present a summary of Plan membership at June 30, 2000 and June 30, 1999. Salary and pension amounts shown are as of June 30 of each year and do not reflect any cost of living increases that may have been effective on July 1 of that year. However, all of these increases were reflected in our valuation calculations.

It was necessary to make assumptions for less than 0.1% of the data records where the information given to us was unreasonable or incomplete. These assumptions did not materially affect the results of our valuation.

The total number of active Members decreased 1.7% since the last valuation. The total number of retired members and their beneficiaries increased 2.1%, while the total average benefit amount increased 4.1%. The following schedule contains a more detailed breakdown of these figures.

The average age and service for Service and Disability Retirements during the past year are shown in the following tables.

| | Average rears of bervice | | |
|--------|--------------------------|--------------------------|--|
| | At Service Retirement | At Disability Retirement | |
| Fire | 30.8 | 29.6 | |
| Police | 27.5 | 24.4 | |

*As of June 30, 2000, there were 4 pensioners in Tier 4, which are included in Tier 3.

Plan Assets

The following asset information was provided to us by the Department of Pensions. We have not audited or verified these figures. These assets are at book value and market value for both the current and prior year. The actuarial value as of June 30, 2000 is a market-related value, described in detail on page 33, Derivation of Actuarial Value of Assets. These figures represent **both pension and health subsidy** reserves.

| Book Value | June 30, 2000 | June 30, 1999 | Percent Change |

| The approximate rates of retuin | n on plan assets are shown | below, based on the following |
|---------------------------------|----------------------------|-------------------------------|
| analysis. | | |

| All Articles Combined | Book Value | Market Value | Actuarial Value |
|--------------------------------------|-----------------------------|-----------------------------|-----------------------------|
| Value of Assets at 6/30/1999 | \$8,737,634,583 | \$11,465,641,579 | \$10,080,747,659 |
| Contributions: City Members | 190,837,163 57,134,923 | 190,837,163 57,134,923 | 190,837,163 57,134,923 |
| Benefits Paid to Participants | 446,619,051 | 446,619,051 | 446,619,051 |
| Expenses Paid Investment Earnings | 43,464,739 1,579,509,365 | 43,464,739 1,790,557,139 | 43,464,739 1,666,540,824 |
| Value of Assets at 6/30/2000 | \$10,075,032,244 | \$13,014,087,014 | \$11,505,176,779 |
| RATE OF RETURN | 18.14% | 15.66% | 16.58% |

The 16.58% rate of return on the actuarial value of assets is greater than the 8.5% rate assumed for the prior year. This resulted in an actuarial gain, which decreased the budgeted contribution for the Plan. We have also calculated the rates of return on actuarial value separately for each Article, reflecting the benefit payments and contribution made to each Article in the rates. The rates of return were 8.87% for Tier 1, 17.45% for Tier 2, and 12.59% for Tiers 3 and 4 combined.

The Plan began to prefund post-retirement health subsidy benefits effective with the 1989-1990 plan year. Total assets must be reduced by the reserve which is being accumulated to pay health subsidy benefits in order to arrive at the assets available for pension benefits.

The breakdown of total Plan assets between those available for pension benefits and those available for health subsidy benefits follows:

| Book Value | Assets for | Assets for | Total |
|-----------------|----------------------|--------------------|----------------------|
| | Pension | Health | Plan |
| | Benefits | Subsidy | Assets |
| Tier 1 | \$ (4,953,171) | \$ 4,967,028 | \$ 13,857 |

Actuarial Valuation As Of June 30, 2000

GASB No. 25 Disclosure

The tables on the following pages are required under Government Accounting Standards Board Statement Number 25. They show the Annual Required Contribution (ARC) as computed under GASB No. 25, as well as what portion of this amount was actually received by the Plan. The current method used for determining Plan contributions satisfies the GASB requirements. As long as actual contributions are made in accordance with the actuarially recommended rates, the "Percentage Contributed" shown on this table will always be 100%. Otherwise additional financial disclosures will be necessary.

Actuarial Balance Sheet

The purpose of the Actuarial Balance Sheet is to compare Plan assets with Plan liabilities in order to define the portion of the liabilities, which need to be funded by the City in the future.

Plan liabilities equal the present value of all future benefits expected to be paid to current and future pensioners and beneficiaries of the Plan.

Plan assets are equal to the sum of:

- the assets currently available to pay benefits,
- the present value of future contributions expected to be made by current Plan Members, and
- the present value of future contributions expected to be made by the City.

The last item, the present value of future City contributions, is made up of two parts:

1. The Present Value of Future City Normal Costs: Using the Entry Age Normal Cost Method, the City budgets a certain percentage of payroll which will be sufficient to fund benefits for Plan Members from their entry into the Plan. The Normal Cost is the level percentage of salary each year that is necessary to fund Members' benefits under the current benefit provisions. Normal Cost is funded from a Member's date of employment to the average expected retirement date. An adjustment is made for the deductions which will be made from the future salaries of Plan Members. For this valuation, the Normal Cost percentages are:

| Tier 1 | 18.275% |
|--------|---------|
| Tier 2 | 22.729% |
| Tier 3 | 14.498% |
| Tier 4 | 13.493% |

The present value of these future City Normal Cost contributions represents one piece of the present value of future City contributions.

2. The Unfunded Actuarial Accrued Liability: The portion of the present value of future City contributions which will not be funded by the future Entry Age Normal Cost contributions is the Unfunded Actuarial Accrued Liability (UAAL). The UAAL arises from prior contributions that were less than the current Normal Cost percentage. This usually results from benefit and assumption changes and the net effect of prior gains and losses. If the City had always contributed the current Normal Cost, if there were no prior benefit or assumption changes and if actual experience exactly matched the actuarial assumptions, the Normal Cost would be sufficient to fund all benefits and there would be no UAAL. This liability is funded based on the provisions of the City Charter, which are described in more detail in the next section.

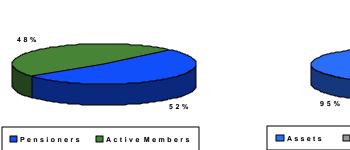

| For the current year, we have determined that the appropriate amounts needed to fund the |
|--|
| UAAL are: |

| Article | Amount | Funding Pattern |
|---------|--------------|---|
| Tier 1 | \$27,585,716 | As a level dollar amount through the fiscal year 2036-2037. |
| Tier 2 | (8.077%) | As a level percent of total payroll of Tiers 1, 2, 3 and 4 through the fiscal year 2036-2037. |
| Tier 3 | (4.491%) | As a level percentage of Tier 3 payroll for various periods based on the source of the liability. |
| Tier 4 | (4.278%) | As a level percentage of Tier 4 payroll for various periods based on the source of the liability. |

For Tiers 2, 3, and 4, the negative amounts above indicate the Article has a surplus; the amortization of the surplus serves to reduce future normal cost contributions.

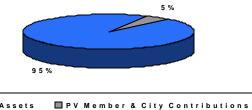

The following chart illustrates the breakdown of Balance Sheet assets and liabilities of the Plan. It shows that 48% of Plan' liabilities are due to active Members and 52% are due to retired Members and their beneficiaries. About 95% of Plan assets consist of currently available assets with 5% consisting of future contributions from the City and the Members.

Budget And Recommended Contributions

The actuarial cost method to be used in determining the annual budget for The Fire and Police Pension Plans, is given in Sections 186.2(1) and (2), 190.09(1) and (2), and 528(1) and (2) of the Charter of the City of Los Angeles.

The Charter defines the annual budget amount to be the sum of the Entry Age Normal Cost plus an amount to amortize the Unfunded Actuarial Accrued Liability (UAAL).

The Entry Age Normal Cost is the level percentage of salary necessary to fund each Member's projected future benefits over his or her working career (i.e. from entry age to retirement age). The Normal Cost consists of two parts: the first part, which is funded by Member contributions, is a specified percentage of the Member's pay; the second part, which is funded by the City, is the balance after deducting the Member paid portion form the total Normal Cost percentage.

The amortization of the UAAL is the payment stream required to fund the excess of Plan liabilities over the sum of the Plan assets, future Member contributions and future City Normal Cost contributions. (See section on the Actuarial Balance Sheet.) The method of amortization varies from Tier to Tier and is defined in the Charter.

The following sections discuss the recommended contributions for each Tier in more detail.

In our opinion, if these recommended 2001-2002 contributions are adopted, all the Plan will be maintained in compliance with the Charter of the City of Los Angeles and in accordance with the methods and assumptions underlying the calculations.

Budget And Recommended Contributions

The Fire and Police Pension Plan, Tier 1

The budgeted contribution for this Plan is the sum of the Entry Age Normal Cost plus the amount needed to amortize the Unfunded Actuarial Accrued Liability in a level dollar amount for the period ending with the fiscal year 2036-2037.

The results for the current year, along with a comparison with the prior year, follow.

| | Recommended 2001-2002 | Recommended 2000-2001 | Percent Change | |
|---|--------------------------|--------------------------|-------------------|--|
| City's Entry Age Normal Cost as a Percent of Payroll* | 18.275% | 18.488% | -1.2% | |
| 2. Amortization of the UAAL | \$27,585,716 | \$28,948,703 | -4.7% | |
| *Percentage is applied to Tier 1 payroll only | | | | |

The effect on the UAAL of gains and losses can be found in the gain and loss analysis in the next section.

Budget And Recommended Contributions

The Fire and Police Pension Plan, Tier 2

The budgeted contribution for this Plan is the sum of the Entry Age Normal Cost plus the amount needed to amortize the Unfunded Actuarial Accrued Liability (UAAL) as a level percent of payroll over the period ending with the fiscal year 2036-2037. The payroll used is the total payroll of Tiers 1, 2, 3, and 4. The payments have been calculated to increase at the same rate as the expected growth in overall Plan payroll (currently 5.0% per year).

Had the Plan experienced no actuarial gains in the past, the UAAL would be paid off in fiscal year 2036-2037. However, the Plan has experienced significant actuarial gains, and as of June 30, 2000, the UAAL has been funded, and the Plan is in a surplus position.

The combination of length of the amortization period and the increasing payment pattern implies that amortization credits for the surplus in the near future are insufficient to cover growth in the surplus due to interest accruals. Therefore, the surplus can be expected to increase for many years, unless actuarial losses cause an offsetting decrease.

| | Recommended 2001-2002 | Recommended 2000-2001 | Percent Change | |
|--|--------------------------|--------------------------|-------------------|--|
| City's Entry Age Normal Cost as a Percent of Payroll* | 22.729% | 21.748% | +4.5% | |
| Amortization of the UAAL/(Surplus) as a Percent of Payroll** | (8.075%) | (3.124%) | -158.5% | |
| *Applied to Tier 2 payroll only **Applied to total payroll of Tiers 1, 2, 3, and 4 combined | | | | |

The results for the current year, along with a comparison with the prior year, follow.

The dollar amount of the amortization of the Actuarial Surplus can be expected to increase by 5.0% per year, as total System payroll increases, if all assumptions are realized.

The effect on the UAAL of gains and losses can be found in the gain and loss analysis in the next section.

Currently, Plan Members under Tier 2 are required to contribute 6% of salary to the Plan. Section 190.10 of the Charter of the City of Los Angeles requires that an additional 1% of salary be contributed by Plan Members if one-half of the cost of the cost-of-living benefits provided by Tier 2 exceeds 1% of pay. The normal cost percent for future cost-of-living benefits is approximately 10% of pay. Therefore, we recommend that New Pension Plan Members continue to contribute 1% in addition to the 6% rate provided in the City Charter, for a total of 7% of salary.

Budget And Recommended Contributions

The Fire and Police Pension Plan, Tier 3

The budgeted contribution for this Plan is the sum of the Entry Age Normal Cost plus the amount needed to amortize the Unfunded Actuarial Accrued Liability caused by gains and losses as a level percent of pay over 15 years. The cost of any changes to the plan would be amortized over 30 years. Changes in assumptions and funding method are amortized over 30 years.

The results for the current year, along with a comparison with the prior year, follow.

| | | Recommended 2001-2002 | Recommended 2000-2001** | Percent Change | |
|-----|---|--------------------------|----------------------------|-------------------|--|
| 1. | City's Entry Age Normal Cost as a Percent of Payroll* | 14.498% | 14.189% | +2.2% | |
| 2. | Amortization of the UAAL/(Surplus) as a Percent of Payroll* | (4.491%) | (3.383%) | -32.8% | |
| 3. | Total Contribution as a Percent of Payroll* | 10.007% | 10.806% | -7.4% | |
| **7 | * Percentage is applied to Tier 3 payroll only. **The recommended contributions shown for 2000-2001 are for Article XXXV, Plans 1 and 2 combined. | | | | |

Budget And Recommended Contributions

The Fire and Police Pension Plan, Tier 4

The budgeted contribution for this Plan is the sum of the Entry Age Normal Cost plus the amount needed to amortize the Unfunded Actuarial Accrued Liability caused by gains and losses as a level percent of pay over 15 years. The cost of any changes to the plan would be amortized over 30 years. Changes in assumptions and funding method are amortized over 30 years.

The results for the current year, along with a comparison with the prior year, follow.

| | | Recommended 2001-2002 | Recommended 2000-2001** | Percent Change | |
|-----|--|--------------------------|----------------------------|-------------------|--|
| 1. | City's Entry Age Normal Cost as a Percent of Payroll* | 13.493% | 14.189% | -4.9% | |
| 2. | Amortization of the UAAL/(Surplus) as a Percent of Payroll* | (4.278%) | (3.383%) | -26.5% | |
| 3. | Total Contribution as a Percent of Payroll* | 9.215% | 10.806% | -14.7% | |
| * F | * Percentage is applied to Tier 4 payroll only | | | | |
| | ** The recommended contributions shown for 2000-2001 are for Article XXXV, Plans 1 and 2 combined. | | | | |

Member Contributions

Members contribute to the Pension Plans based on schedules contained in the City Charter. These contribution rates can be found in Exhibit I.

The Member contribution account balances (including interest) that were reported for the June 30, 2000 valuation are:

| | Fire Members | Police Members | Total |
|--------|---------------|----------------|---------------|
| Tier 1 | \$ 0 | \$ 195,406 | \$ 195,406 |
| Tier 2 | 160,780,914 | 250,987,270 | 411,768,183 |
| Tier 3 | 73,606,879 | 209,529,377 | 283,136,256 |
| Tier 4 | 40,841,361 | 75,840,530 | 116,681,891 |
| Total | \$275,229,153 | \$536,552,583 | \$811,781,737 |

Gain And Loss Analysis

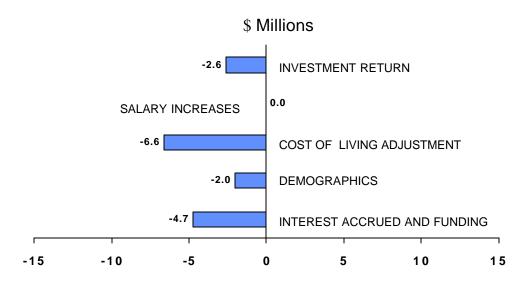

Each year, the contributions to the Plans are determined as a level percent of future Plan payroll. If actual experience matched all the assumptions used in the valuation, and no changes were made to the Plans, this contribution rate would not change. However, each year there are actuarial gains and losses caused by actual experience which is different than our assumptions. An actuarial gain causes a decrease in contribution levels; an actuarial loss causes an increase.

An analysis of the gains and losses over the past year, and their effect on the Unfunded Accrued Actuarial Liability (UAAL) for each Article, follows.

Tier 1

| (Gain)/Loss Analysis For Plan Year July 1, 1999 To June 30, 2000 | | | | |

Introduction

Members of the Los Angeles Fire and Police Department are entitled to post-retirement health subsidy benefits under Sections 189, 190.50 and 536 of the City Charter, and by related Ordinance. Members who retire from the Fire and Police Pension Plan with over ten years of service are eligible for health subsidy benefits. Regular benefits begin at age sixty. Temporary subsidies are available to certain groups at earlier ages.

The benefit paid is a percentage of a maximum subsidy for health care based on the lesser of the amount used by the City Employees' Retirement Plan (CERS) and active Safety Members. The City also pays Medicare Part B premiums for any pensioner receiving a subsidy and Medicare Parts A and B coverage.

Health subsidy benefits are available to Members and their spouses/domestic partners on disability and service retirement. Effective December 1999, Surviving spouse/domestic partners are eligible for health subsidy benefits.

The Plan began pre-funding the health subsidy benefits effective with the 1989-1990 plan year. Full funding was phased in over four years.

For more detail on the health subsidy benefit provisions, please refer to Exhibit II.

This report contains the results of the June 30, 2000 valuation of the post-retirement health subsidy benefits of the Plans. It contains the results of our calculations of the annual budget of the Plans, as provided in Sections 186.2(3), 190.09(3), and 528(3) of the Charter. In determining the budget amounts for post-retirement health subsidy benefits, we have used the same funding method and methods of amortization used in funding the retirement, disability, and death benefits of each Article, as defined in the Charter.

The valuation is based on the economic and demographic assumptions used in the valuation of the retirement, death and disability benefits of the Plans. In addition, special medical trend assumptions were used. A summary of the economic assumptions follows:

- 8.5% annual interest,
- individual salary increase assumption, which varies by age, ranging from 10% for Members under age 25, to 5.5% for Members age 50 and over, and averages 6.5% per year over a full 30-year career,
- 5.0% annual increases in total Plan, and
- graded medical cost increase rates of 7.75% for pre-65 premiums and 7.5% for post-65 premiums in 2000, both decreasing gradually to 6.5% in 2006 and beyond.

We believe these assumptions are appropriate for use in the evaluation of the health subsidy liabilities of the Fire and Police Pension Plan at June 30, 2000. These assumptions are described in more detail in Exhibit IV.

Health Subsidy Reserve

The Fire and Police Pension Plan began to pre-fund the health subsidy benefits of the Plan beginning with the 1989-1990 plan year. As of June 30, 2000, pre-funding contributions have been made for ten years toward the health subsidy.

The Plan has begun to accumulate a reserve of assets that reflects contributions made, benefits paid out, and estimated investment earnings. Health subsidy liabilities were offset by the actuarial value of these assets held in reserve in the determination of annual budget amounts.

| Assets Available For Health Subsidy Reserves at June 30, 2000 | | | | |
|--|-------------|---------------|---------------|--|
| Tier 1 Tier 2 Tiers 3 and | | | | |
| Book Value | \$4,967,028 | \$253,597,363 | \$201,365,573 | |
| Market Value | 4,966,672 | 285,934,946 | 230,862,511 | |
| Actuarial Value | 3,973,622 | 291,194,399 | 244,072,552 | |

Actuarial Balance Sheet

The purpose of the Actuarial Balance Sheet is to compare Plan assets with Plan liabilities in order to define the portion of the liabilities which need to be funded by the City in the future. We have created a health subsidy balance sheet which corresponds to the balance sheet for retirement, disability, and death benefits shown earlier in this report.

Health subsidy liabilities equal the present value of all future health subsidy benefits expected to be paid to current and future pensioners and beneficiaries of the Plan.

Plan assets are equal to the sum of:

- the assets currently available to pay health subsidy benefits, and
- the present value of future contributions expected to be made by the City.

There are no Member contributions for health subsidy benefits.

The last item, the present value of future City contributions, is made up of two parts:

 The Present Value of Future City Normal Costs: Using the Entry Age Normal Cost Method, the City budgets a certain percentage of payroll which will be sufficient to fund health subsidy benefits for Plan Members from their entry into the Plan. The Normal Cost is the level percentage of salary each year that is necessary to fund Members' benefits under the current benefit provisions. Normal Cost is funded from a Member's date of employment to the average expected retirement date. For this valuation, these percentages are:

| Tier 1 | 0.129% |
|--------|--------|
| Tier 2 | 1.257% |
| Tier 3 | 3.084% |
| Tier 4 | 3.122% |

The present value of these future City Normal Cost contributions represents one piece of the present value of future City health subsidy contributions.

The Normal Cost percentage is highest for Tiers 3 and 4, with the youngest active population, and lowest for Tier 1, with the oldest active population. The Normal Cost spreads the value of a Member's benefit, at entry age, over his future working lifetime. The value of health subsidy benefits at entry age is higher for Tiers 3 and 4 Members, because the health care benefits paid to them will be more expensive, due to the future increases in the cost of medical care.

2. The Unfunded Actuarial Accrued Liability: The portion of the present value of future City health subsidy contributions which will not be funded by the future Entry Age Normal Cost contributions is the Unfunded Actuarial Accrued Liability (UAAL). The UAAL arises because pre-funding contributions were not made for health subsidy benefits before 1989. If the City had always contributed the current Normal Cost, if there were no prior benefit or assumption changes and if actual experience exactly matched the actuarial assumptions, the Normal Cost would be sufficient to fund all health subsidy benefits and there would be no UAAL. This liability is funded based on the provisions of the City Charter.

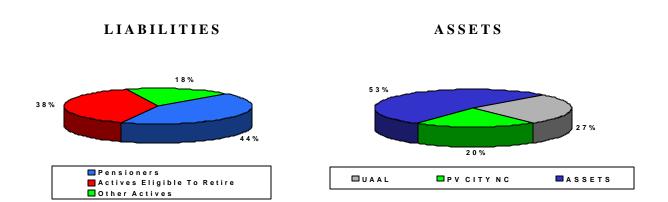

| Tiers | Amount | Funding Pattern | | | | |
|--------|-------------|---|--|--|--|--|
| Tier 1 | \$1,036,696 | As a level dollar amount through the fiscal year 2036-2037. | | | | |
| Tier 2 | 1.766% | As a level percent of total payroll of Articles XVII, XVIII and XXXV through the fiscal year 2036-2037. | | | | |
| Tier 3 | (1.233%) | As a level percentage of Article XXXV payroll for periods of 15 or 30 years. | | | | |
| Tier 4 | (1.101%) | As a level percentage of Article XXXV payroll for periods of 15 or 30 years. | | | | |

For the current year, we have determined that the appropriate amounts needed to fund the health subsidy UAAL are:

For Tiers 3 and 4, the negative amount above indicates the Article has a surplus; the amortization of the surplus serves to reduce future normal cost contributions.

The following chart illustrates the breakdown of Balance Sheet assets and liabilities of the Plan. It shows that about 44% of the Plans' liabilities are due to current pensioners, 18% due to actives eligible to retire, and 38% due to other actives. About 20% of Plan assets consist of future Normal Cost contributions and 27% are due to future UAAL contributions. Current health subsidy reserves are approximately 53% of Plan assets.

Budget and Recommended Contributions

The actuarial cost method to be used in determining the annual health subsidy budget for the Fire and Police Pension Plans is given in Section 186.2, 190.09, and 528 of the Charter of the City of Los Angeles.

The Charter defines the annual budget amount to be the sum of the Entry Age Normal Cost plus an amount to amortize the Unfunded Actuarial Accrued Liability (UAAL).

The Entry Age Normal Cost is the level percentage of salary necessary to fund each Member's projected future health subsidy benefits over his or her working career (i.e. from entry age to retirement age).

The amortization of the UAAL is the payment stream required to fund the excess of Plan health subsidy liabilities over the sum of the Plan assets and future City Normal Cost contributions. (See section on the Actuarial Balance Sheet.) The method of amortization varies from Article to Article and is defined in the Charter.

The following sections discuss the recommended health subsidy contributions for each Article in more detail.

In our opinion, if these recommended 2001-2002 contribution rates are adopted, all the Plans will be maintained in compliance with the Charter of the City of Los Angeles and in accordance with the methods and assumptions underlying the calculations.

Health Subsidy Budget and Recommended Contributions

The Fire and Police Pension Plan, Tier 1

The budgeted health subsidy contribution for this Plan is the sum of the Entry Age Normal Cost plus the amount needed to amortize the Unfunded Actuarial Accrued Liability in a level dollar amount for the period ending with the fiscal year 2036-2037.

The results for the 2001-2002 fiscal year, along with a comparison with the prior year, follows.

| | Recommended 2001-2002 | Recommended 2000-2001 | Percent Change |
|---|--------------------------|--------------------------|-------------------|
| City Entry Age Normal Cost as a Percent of Payroll* | 0.129% | 0.219% | -41.0% |
| 2. Amortization of the UAAL | \$1,036,696 | \$425,623 | +143.6% |
| *Percentage is applied to Tier 1 payrol | 11. | | |

Health Subsidy Budget and Recommended Contributions

The Fire and Police Pension Plan, Tier 2

The budgeted health subsidy contribution for this Plan is the sum of the Entry Age Normal Cost plus the amount needed to amortize the Unfunded Actuarial Accrued Liability (UAAL) as a level percent of payroll over the period ending with the fiscal year 2036-2037. The payroll used is the total payroll of Tiers 1, 2, 3, and 4. The payments have been calculated to increase at the same rate as the expected growth in overall Plan payroll (currently 5.0% per year).

The results for the 2001-2002 fiscal year, along with a comparison with the prior year, follows.

| | Recommended 2001-2002 | Recommended 2000-2001 | Percent Change | |
|--|--------------------------|--------------------------|-------------------|--|
| City Entry Age Normal Cost as a Percent of Payroll* | 1.257% | 1.256% | +0.1% | |
| 2. Amortization of the UAAL as a Percent of Payroll** | 1.766% | 1.539% | +14.8% | |
| *Applied to Tier 2 payroll only. **Applied to total payroll of Tiers 1, 2, 3, and 4 combined. | | | | |

CITY OF LOS ANGELES FIRE AND POLICE PENSION PLANS VALUATION OF HEALTH SUBSIDY BENEFITS

Health Subsidy Budget and Recommended Contributions

The Fire and Police Pension Plan, Tier 3

The budgeted health subsidy contribution for this Plan is the sum of the Entry Age Normal Cost plus the amount needed to amortize, as a level percent of pay over 15 years, any increases and decreases in the Unfunded Actuarial Accrued Liability (UAAL) caused by gains and losses. The cost of any changes to the plan or to assumptions are amortized over 30 years. The initial UAAL was amortized over 30 years.

The results for the 2001-2002 fiscal year, along with a comparison with the prior year, follows.

| | Recommended 2001-2002 | Recommended 2000-2001** | Percent Change |
|---|-----------------------|----------------------------|-------------------|
| City Entry Age Normal Cost as a Percent of Payroll* | 3.084% | 2.966% | +4.0% |
| Amortization of the UAAL/(Surplus) as a Percent of Payroll* | (1.233%) | (1.088%) | -13.3% |
| 3. Total Contribution, as a Percent of Payroll* | 1.851% | 1.878% | -1.4% |
| *Percentage is applied to Tier 3 payr **The recommended contributions Plans 1 and 2 combined. | 2 | 2001 are for Artic | ele XXXV, |

CITY OF LOS ANGELES FIRE AND POLICE PENSION PLANS VALUATION OF HEALTH SUBSIDY BENEFITS

Health Subsidy Budget and Recommended Contributions

The Fire and Police Pension Plan, Tier 4

The budgeted health subsidy contribution for this Plan is the sum of the Entry Age Normal Cost plus the amount needed to amortize, as a level percent of pay over 15 years, any increases and decreases in the Unfunded Actuarial Accrued Liability (UAAL) caused by gains and losses. The cost of any changes to the plan or to assumptions are amortized over 30 years. The initial UAAL was amortized over 30 years.

The results for the 2001-2002 fiscal year, along with a comparison with the prior year, follows.

| | Recommended 2001-2002 | Recommended 2000-2001** | Percent Change |
|---|--------------------------|----------------------------|-------------------|
| City Entry Age Normal Cost as a Percent of Payroll* | 3.122% | 2.966% | +5.3% |
| Amortization of the UAAL/(Surplus) as a Percent of Payroll* | (1.101%) | (1.088%) | -1.2% |
| Total Contribution, as a Percent of Payroll* | 2.021% | 1.878% | +7.7% |
| *Percentage is applied to Tier 4 payr **The recommended contributions Plans 1 and 2 combined. | 5 | 2001 are for Artic | ele XXXV, |

CITY OF LOS ANGELES FIRE AND POLICE PENSION PLAN VALUATION OF HEALTH SUBSIDY BENEFITS

Assumptions and Methods

The assumptions used in the valuation of health subsidy benefits are very critical. They must anticipate a number of future occurrences, such as:

- Future rate of return on Plan assets
- Future increases in the cost of medical care
- Future changes in the proportion of medical care costs covered by Medicare
- Future changes in medical care utilization
- Future participation in the health subsidy benefits
- Future participation of Plan Members in Medicare Parts A and B

These assumptions must be reasonable on their own, and in conjunction with each other. They also must result in a realistic relationship of future medical care costs with the economy as a whole.

We have developed a set of actuarial assumptions for use in this valuation of the health subsidy benefits of the Fire and Police Pension Plan. A detailed outline of these assumptions can be found in Exhibit IV. A summary of the two most critical of these assumptions follows:

1. Investment Return: 8.5%

This rate reflects the expected earnings of the Plans' assets. Currently, health subsidy assets are commingled with the rest of the Plans' assets, and invested in the same manner. Therefore, it is appropriate that this rate of return be the same as that used in the valuation of retirement, disability, and death benefits of the Plans.

2. Medical Trend Rate:

This rate encompasses future changes in medical care prices, utilization and Medicare. The increases we have assumed begin with an 7.75% increase in 2001-2002 for pre-65 premiums and 7.5% for post-65 premiums. These rates decrease slowly until an ultimate rate of 6.5% is reached in 2006 and thereafter.

In order to value future subsidy benefits for Members not yet retired, we must determine the average subsidy amount being paid to current Fire and Police Pension Plan pensioners. We analyzed current data and determined the average subsidy amount being paid, per year of service. We applied these average subsidy amounts, with the appropriate medical trend increases, to future subsidy recipients in order to determine the present value of future benefits from the Plan.

More detail on these average claim rates can be found in Exhibit IV.

| C. | Basic death benefit | None. | None. | In addition to return of contributions, beneficiary receives one-year average salary times years of completed service (not to exceed 6). |
| d. | Optional forms of benefit | None. | None. | At service or disability retirement, Member may elect higher death benefit with corresponding actuarial reduction of retirement benefit. |

Summary of Health Subsidy Benefit Provisions

BASIC SUBSIDY

| Eligibility: | Retired Members age 55 and over who retired with 10 |
|--------------|---|
| | or more years of service. Members who retire prior to |
| | July 1, 1999 are subject to an eligibility requirement of |
| | age 60 with 10 or more years of service. Subsidy is |
| | paid only to Members on service, or disability |
| | retirements. Surviving spouses/domestic partners are |
| | eligible for benefits upon the death of the Member. |
| | Basic subsidy is paid until age 65, or after age 65 if |
| | Member is not covered by Medicare Parts A and B. |
| | |

- Amount of Subsidy:4% per year of service, to a maximum of 100%, timesMaximum Subsidy, subject to a maximum of the actual
premium paid to City approved health carrier.
- Maximum Subsidy: Lesser of monthly amount paid to active Fire and Police Members and retired CERS Members. Effective July 1, 2000, maximum is \$483 per month. For Surviving spouses, the maximum subsidy is \$303.22 per month.
- Increase in Subsidy: Based on the lesser of the rate increases to active Fire and Police Members or the dollar increase to the civilian retirees, 2 party non Medicare Kaiser plan, subject to Board approval.

Spousal/Domestic Partner

MEDICARE PREMIUM SUBSIDY

For retired Members enrolled in Medicare A & B who are receiving a subsidy, the Plan provide payment of Part B premiums (\$45.50 per month for calendar year 2000).

Summary Of Actuarial Assumptions And Methods Used for Valuation of Pension Benefits

Interest Rate:

8.5% per year.

Salary Increases:

The total payroll of the Plan is assumed to increase 5.0% per year.

Annual salary increases for individuals vary by age.

| Age | Annual Salary Increase |
|-------------|------------------------|
| Under 25 | 10.00% |
| 25-29 | 9.00% |
| 30-34 | 8.00% |
| 35-39 | 7.00% |
| 40-44 | 6.00% |
| 45-49 | 5.75% |
| 50 and over | 5.50% |

Cost-of-Living:

Mortality:

A. Tiers 1 and 2: 5.0% per year on all benefits.

- B. Tiers 3 and 4: 3.0% per year on all benefits.
- A. For Pensioners on service retirement:

1994 Group Annuity Mortality Basic Table.

| Sample Rates | | | |
|--------------|---------------------|----------------------------|--|
| Age | Deaths per 1,000 | Average Life Expectancy | |
| 45 | 1.7 | 34.7 | |
| 50 | 2.8 | 30.1 | |
| 55 | 4.8 | 25.5 | |
| 60 | 8.6 | 21.2 | |
| 65 | 15.6 | 17.3 | |
| 70 | 25.5 | 13.8 | |
| 75 | 40.0 | 10.7 | |

B. For Pensioners on disability retirement:

Probabilities of Meeting Vesting Requirements:

A. Tier 2:

1. Probability of Working 20 Years

| Age At Hire | Fire Members | Police Members |
|----------------|-----------------|-------------------|
| Under 25 | 62.1% | 52.5% |
| 25-29 | 74.1 | 63.6 |
| 30-34 | 76.7 | 68.4 |
| 35-39 | 67.4 | 68.2 |
| 40-44 | 46.4 | 65.6 |
| 45-49 | 29.0 | 61.8 |

2. Probability of Working 10 Years

| Age At Hire | Fire Members | Police Members | |
|----------------|-----------------|-------------------|--|
| Under 25 | 70.2% | 64.1% | |
| 25-29 | 82.5 | 75.7 | |
| 30-34 | 88.5 | 82.0 | |
| 35-39 | 89.9 | 84.0 | |
| 40-44 | 86.7 | 83.4 | |
| 45-49 | 75.0 | 81.2 | |

- B. Tiers 3 and 4:
 - 1. Probability of Working to Age 50

| Age at Hire | Fire Members | Police Members |
|----------------|-----------------|-------------------|
| under 25 | 56.0% | 47.2% |
| 25-29 | 70.6 | 56.8 |
| 30-34 | 79.8 | 62.5 |
| 35-39 | 85.7 | 66.9 |
| 40-44 | 90.2 | 71.4 |
| 45-49 | 95.3 | 76.2 |

| Age at Hire | Fire Members | Police Members |
|----------------|-----------------|-------------------|
| Under 25 | 70.2% | 65.5% |
| 25-29 | 82.5 | 70.9 |
| 30-34 | 88.5 | 71.7 |
| 35-39 | 89.9 | 70.7 |
| 40-44 | 86.7 | 68.6 |
| 45-49 | 75.0 | 65.4 |

2. Probability of Working 10 Years

3. Probability of Working to Age 50 with 10 Years

| Age at Hire | Fire Members | Police Members |
|----------------|-----------------|-------------------|
| under 25 | 56.0% | 47.2% |
| 25-29 | 70.6 | 56.8 |
| 30-34 | 79.8 | 62.5 |
| 35-39 | 85.7 | 66.9 |
| 40-44 | 86.7 | 68.6 |
| 45-49 | 75.0 | 65.4 |

4. Probability of Working 20 Years

| Age at Hire | Fire Members | Police Members |
|----------------|-----------------|-------------------|
| Under 25 | 62.1% | 54.2% |
| 25-29 | 74.1 | 59.9 |
| 30-34 | 76.7 | 60.0 |
| 35-39 | 67.4 | 57.5 |
| 40-44 | 46.4 | 54.0 |
| 45-49 | 29.0 | 49.9 |

Dependents:

Where no other information is available, Members are assumed to have two children with a three year difference in age. The eldest is assumed to reach age 21 when the participant reaches age 45.

Proportion of Members with Spouses or domestic partners at Retirement:

86%.

Average Service-Connected Disability Benefits:

Benefits are assumed to follow this schedule:

| Years of Service at Time of Disability | Percent of Salary Base |
|--|---------------------------|
| Less than 20 | 50% |
| 20-30 | 60% |
| Over 30 | 70% |

Average Nonservice-Connected Disability benefit for Tiers 3 & 4: 40% of Salary Base.

Funding Method: Entry Age Normal Funding Method.

Asset Valuation Method: The actuarial value of assets is determined by phasing in, over five years, the difference between the actual and expected realized and unrealized appreciation. The expected appreciation is based on the assumed 8.5% rate of return. The actuarial value of assets can be no less than 80% and no greater than 120% of the market value of assets.

Summary of Actuarial Assumptions and Methods Used For Valuation of Health Subsidy Benefits

Interest Rate:

8.5%.

Salary Increases:

| Age | Annual Salary Increase |
|-------------|------------------------|
| Under 25 | 10.00% |
| 25-29 | 9.00% |
| 30-34 | 8.00% |
| 35-39 | 7.00% |
| 40-44 | 6.00% |
| 45-49 | 5.75% |
| 50 and over | 5.50% |

Medical Inflation Rate:

| Year | Pre-65 | Post-65 |
|-----------|--------|---------|
| 2001-2002 | 7.75% | 7.50% |
| 2001-2002 | 7.50% | 7.25% |
| 2002-2003 | 7.25% | 7.00% |
| 2003-2004 | 7.00% | 6.75% |
| 2004-2005 | 6.75% | 6.50% |
| 2005+ | 6.50% | 6.50% |

Medicare Premium Inflation Rate:

| Year Increase | Y |
|---------------|----|
| 2000+ 6.5% | 20 |

| Members Assumed To Receive Subsidy: | 859 | % |
|--|-----------------|--|
| Members Assumed Married or have Domestic Partners At Retirement: | 869 | % |
| Members Assumed To Receive Medicare A&B: | 909 | % |
| Surviving Spouses Assumed To Elect Health Subsidy | 70 ⁰ | % |
| Mortality: | A. | For Pensioners on service retirement: |
| | | 1994 Group Annuity Mortality Basic Table. |
| | В. | For Pensioners on disability retirement: |
| | | 1984 PBGC Disabled Life Mortality Table for males not receiving Social Security with ages setback three years. |
| | C. | For Spouses: |
| | | 1994 Group Annuity Mortality Basic Table, with four year setback. |

Average Subsidy Rates as of June 30, 2000:

| Age of Pensioner | Monthly Subsidy Per Year of Service* |
|---------------------|---|
| Under Age 65 | \$13.56 for Single Member \$16.09 for Married Member \$ 9.50 for Surviving Spouses |
| Age 65 and Over | \$8.84 for Single Member with Medicare \$10.96 for Married Member with Medicare \$12.80 for Single Member without Medicare \$16.31 for Married Member without Medicare \$6.11 for Surviving Spouses |
| *Maximum se | \$6.11 for Surviving Spouses ervice for this purpose is 25 years. |

Funding Method:

Asset Valuation Method:

Entry Age Normal Funding Method.

The actuarial value of assets is determined by phasing in, over five years, the difference between the actual and expected realized and unrealized appreciation. The expected appreciation is based on the assumed 8.5% rate of return. The actuarial value of assets can be no less than 80% and no greater than 120% of the market value of assets.

CITY OF LOS ANGELES FIRE AND POLICE PENSION PLANS Rates Of Separation From Active Service

A schedule of the probabilities of termination of employment due to the following causes can be found on the following pages:

| 1. | Ordinary Withdrawal: | Member terminates and elects a refund of Member contributions. | | | | | | | | |
|----|--|---|--|--|--|--|--|--|--|--|
| 2. | Service Retirement: | Member retires after meeting age and service requirements for reasons other than disability. | | | | | | | | |
| 3. | Ordinary Disability: | Member receives disability retirement; disability is not service related. | | | | | | | | |
| 4. | Service Disability: | Member receives disability retirement resulting from service related disability. | | | | | | | | |
| 5. | Ordinary Death: | Member dies before eligibility for retirement; death is not service related. | | | | | | | | |
| 6. | Service Death: | Member dies before retirement as a result of assigned duties. | | | | | | | | |
| 7. | Death While Eligible for Service Retirement: | Member dies before retirement but after meeting age and service requirements for service retirement. | | | | | | | | |
| 8. | Death While Eligible for Disability Retirement: | Member dies before retirement but after meeting age and service requirements for disability retirement. | | | | | | | | |

Each rate represents the probability that a Member will separate from service at each age due to the particular cause. For example, a rate of 0.0277 for a Fire Member's service retirement at age 45 means we assume that, on average, 2.77 out of 100 Members who are age 45 will retire at that age.

City of Los Angeles Fire and Police Pension System Rates of Separation From Active Service For Fire Members
